

INVASIVE SPECIES PROJECT REQUIREMENTS

With a partner you will receive an information packet about invasive species. Complete the following steps of the assignment. Your final project will count as a quiz grade.

Step 1: Read all the articles in the packet.

Step 2: Work with your poster prep questions.

INVASIVE SPECIES 'POSTER PREP' QUESTIONS

After reading your invasive species articles, answer the following questions on a separate sheet of paper.

WRITE ALL ANSWERS IN COMPLETE SENTENCES

1. What is the name of your invasive species? Is it a plant or an animal?
2. Where did your invasive species originate? (What continent, country or region)
3. What geographic location is your invasive species currently 'invading'?
4. Explain how your invasive species got to/traveled to the area that it is now in.
5. What other species is your invasive species affecting? (example: African Killer Bees are taking up the living space of native south American honey bees, and the honey bees are dying out)
6. What major problems is your invasive species causing
7. What is being done to prevent your invasive species from spreading into more areas?
8. Add three additional pieces of information that you learned about your species.

ONCE YOU HAVE MADE YOUR POSTER, PREPARE TO GIVE A 3-5 MINUTE PRESENTATION WITH YOUR PARTNER.

Step 3: sketch a rough draft of what you want your poster to look like (**your final must include ALL the information from your poster prep questions.**)

Step 4: show your poster rough draft, and collect your poster materials. Remember: (**your final must include ALL the information from your poster prep questions.**)

Step 5: Once your poster is done, prepare to give a 3-5 minute presentation on the information that you have gathered. Both partners must speak in the presentation.
